OpTek Systems provide unsurpassed capability in manufacturing of components with precision features

Whether you intend to sub-contract or purchase a machine, OpTek Systems specializes in providing production-ready, cost effective, micromachining laser processes

OpTek Systems
A world-class manufacturing partner for laser micromachining. Complete solutions from concept to production:

- Process development and optimization
- Sub-contract services
- Turnkey machine tools
- Automation
- Inspection

Precision Laser Machining Systems
OpTek Systems provides fully integrated machines packed with features for high-volume production laser processing:

- Precision laser drilling, milling and cutting of most materials
- Laser trimming of electronic circuits and devices
- Stripping of catheters, optical fiber, insulated conductors
- Laser cutting of glass fibers and capillaries
- Creation of lenses on optical fiber
- Laser marking

Added Value
Outsource with OpTek Systems. In addition to production line equipment, OpTek also provides:

- Development partnerships
- Contract manufacturing
- Integration into new or existing production lines
